COMUNY
Empowering Personal Data

Backend Developer for Mobile Identity Technology (remote)(m/w/d)

Want to join a team where your work makes a significant impact on data privacy and data sovereignty for everyday people? comuny works on a future where your mobile phone carries and protects all your personal data you shall need in your everyday life with officials and service providers. We make sure you have it fully under control who you share your data with. With a state-of-the-art de-centralized architecture, the comuny tech team thrives by staying ahead of the curve of the demanding mobile identity world. We are a small team of makers out of the health and cybersecurity sector and are in search of somebody contributing to our vision big time.

Insurances, health insurances, banks, the German states... all require verified customer identities, authentication at services, digital signatures to digitize their most precious use cases. This is where comuny comes in with a revolutionary de-centralized approach. We simplify processes through standardization, normalization, and decentralization, by making them more secure at same time.

Where you come in

- Our backend guarantees the secure transmission of personal data from the user to the service. You develop this along this way from the early MVP we have today, to product launch and further. Availability of the service as well as the security of the transmitted data are in focus. Automate the hell out of it
- You will be supported for a while by external developers, guide them and help us building up our core future team
- Secure handling of user data, understanding state/security regulations, and interpolate them into our software will be key
- completed studies and / or training with focus on computer science, application development or similar, gladly also career changers with appropriate experience
- **+3 years proven experience and success in programming backends with Kotlin +5 years on backend development**
- You should know Linux/MacOS, git and gitflow
- Like to use Clean Code and Uncle Bob
- Fancy agile, TDD, pair programming, CI
- Have hands-on experience with HTTP (REST) APIs in design and usage
- You have an eye for possibilities and quality
- You are fluent in English and ideally, you speak German as well (not a must)
- Residence in Germany
- Ideally have led own projects before

What we offer you

- International team with a German heart
- comuny values diversity. We're proud to be an equal opportunity employer and consider qualified applicants without regard to age, disability, gender reassignment, marriage or civil partnership, pregnancy and maternity, race, religion or belief, sex
- Build a team, a startup, and a product almost from scratch together with us
- Create something big that will change the lives of every German for the better
- Most modern technologies and tools in a distributed team
- Full responsibility from day one
- in a fully remote work environment and with Flexible working hours (even when we are finally done with corona)
- Fair salary & Impact!

Come on Board! We are fast, think big, and have fun! Tell us about yourself, including earliest possible start date and salary expectations. Get in contact with Beatrix directly (+49 152 088 10 415) or on info@comuny.de. We are looking forward to meet you!
