

# QA Engineer (full remote)

Want to join a team where your work makes a significant impact on data privacy and data sovereignty for everyday people? comuny works on a future where your mobile phone carries and protects all your personal data you shall need in your everyday life with officials and service providers. We make sure you have it fully under control who you share your data with.

With average build times under a minute, Kotlin & Swift adoption, and a state-of-the-art architecture, the comuny tech team thrives by staying ahead of the curve of the demanding mobile world. We are a small team of makers out of the health and cybersecurity sector and are in search of somebody contributing to our vision big time.

Insurances, health insurances, banks, the German states... all require verified customer identities, authentication at services, digital signatures to digitize their most precious use cases. This is where comuny comes in with a revolutionary de-centralized approach. We simplify processes through standardization, normalization, and decentralization, by making them more secure at same time.

## Where you come in

- **QA Engineer:** You are the gate between development and delivery. You organize, consult and push our software to higher standards. You make sure what we deliver is in line with the regulatory & certified rules we have to comply with
- Designing, building, testing and deploying effective test automation solutions on iOS, Android and in our Swift iOS/Kotlin Android/ Kotlin Backend environments
- Participate in how the software is delivered through our CI pipeline in a Kubernetes environment from the point of view of the customer
- Maintain and enhance automation frameworks that can be used by both Development and QA
- Estimate, prioritize, plan, execute or coordinate testing activities
- Define, improve and implement QA best practices
- Create a E2E test environment for our oftentimes abstract B2B software with the team
- **Guard Regulatory & Security:** Drive or support the basics of PenTesting (SQL Injections, XSS, CSRF etc.)
- Guard & introduce thee OWASP Top 10s with the team
- Drive or support the basics of load and performance testing and make sure our software is lightning fast but secure

## You are somebody that has

- Excellent coding skills using scripting languages (Python, Shell or Typescript).
- Experience developing test strategies, test plans, and test cases
- Experience with UI automation frameworks
- Experience with mobile app development and/or testing
- Experience with Ops & Cloud
- Ability to work in Agile environment
- A fast learner with good problem solving and analytical skills
- Fluency in English, verbal and written, German is a plus

## What we offer you?

- International team with a german heart
- comuny values diversity. We're proud to be an equal opportunity employer and consider qualified applicants without regard to age, disability, gender reassignment, marriage or civil partnership, pregnancy and maternity, race, religion or belief, sex
- Build a team, a startup, and a product almost from scratch together with us
- Create something big that will change the lives of every German for the better
- Most modern technologies and tools in a distributed team
- Full responsibility from day one
- in a fully remote work environment and with Flexible working hours (even when we are finally done with corona)
- Fair salary & Impact!

Come on board! We are fast, think big, and have fun! Get in contact with Beatrix directly (+49 152 088 10 415) or on [info@comuny.de](mailto:info@comuny.de). We are looking forward to meet you!
